Algorithmic Identity Based on Metaparameters: A Path to Reliability, Auditability, and Traceability GLOBAL High

arXiv (Security) | 2026-01-26 | Academic Research & Papers

arXiv:2601.16234v1 Announce Type: new Abstract: The use of algorithms is increasing across various fields such as healthcare, justice, finance, and education. This growth has significantly accelerated with the advent of Artificial Intelligence (AI) technologies based on Large Language Models (LLMs) since 2022. This expansion presents substantial challenges related to accountability, ethics, an...
